

TheBigCloud

Virtual Desktop Solutions

TheBigCloud Highlights

An always-accessible, virtual desktop available from any modern device

The full suite of Office 365 apps, with all data seamlessly migrated

Provisioned with full backup and additional security options to keep users safe and data defended.

Fully supported by CMI, removing complexities and covering your technical issues and queries

Overview

The Modern Workplace is increasingly Cloud-reliant, granting anytime access to files, apps and data, and providing near-limitless growth for the burgeoning business. Yet the Cloud can also be complex, with migration, security and compliance concerns proving prohibitively difficult to some. Overcoming the barrier for entry, and embracing the flexibility of a Cloud workspace, is key to keeping a modern business competitive.

Introducing TheBigCloud

TheBigCloud is our always available workspace combining all the email, communications and office applications a modern employee needs. Deployed by CMI, and with your workplace data migrated seamlessly, your move to a Cloud enabled workplace is simplified and streamlined, with all software management handled by us.

Designed to enhance workplace efficiency and provide simple, streamlined Cloud benefits, our Big Cloud solution is also covered by a dedicated support desk and additional security options as needed. As your circumstances change, your virtual desktop can be scaled to fit, providing a solution that's easy to deploy, but built to last.

Modernised, simplified, and made for the future workplace

TheBigCloud isn't just a solution - it's a full service.

Many businesses know that their future is Cloud-dependant, yet struggle to migrate to their new Cloud environment. TheBigCloud tackles that migration and management with your full cooperation, migrating all business-critical data and setting up all included services to your policies. You can be confident that your business is optimised, future proofed, and making the most of the Cloud's near-limitless potential.

Everything, anywhere

Access your desktop, emails, apps and data - a single connection provides everything users need to work without complication.

Inclusive User Helpdesk Support

Our, rapidly responding support team ensures your setup receives the same bespoke CMI service you expect.

Cost Management

Servers, software and ongoing maintenance; all are included in the cost of your solution, making monthly outgoings simple and predictable.

Device Agnostic

Tablets, smartphones, laptops... whatever you're using, a virtualised desktop is one that's available on almost any modern device.

Efficient Expansion

As your business needs fluctuate, so too should your BigCloud desktop. We implement new user provisions to your environment, rapidly and as needed.

Extensive Email

Access data, applications and everything else you need from anywhere. Let nothing come between you, your clients and your co-workers.

Guaranteed Uptime

A guaranteed 99.9% of uptime provides a confident approach to continuity - and an effective addition to your remote working setup.

Safe and Secured

Secure Cloud servers, targeted threat protection across all perimeters, security awareness training and a Secure Email Gateway included.

What to expect from your Big Cloud Virtual Desktop solution

We begin by exploring your business's existing environment, identifying your technical capacity and compatibility with TheBigCloud. We'll also confer with you to better understand your company's needs and aspirations - and whether TheBigCloud is the option for you.

Next, we plan your migration from your current environment to your BigCloud Azure environment. During migration, we work with you to create a file structure to help accommodate your historical work and data. This service also includes all setup and configuration of your BigCloud, plus Azure connectivity between user PCs, local printing and scanning and all other technologies needed to get you up and running.

Core Services Include:

- Initial consultation and investigation of your technical capacity
- Full migration to your BigCloud Azure environment
- Migration of emails, files, data and apps, including historical data
- Deployment of Email and Web Browser security solutions
- Setup of a reliable back-up solution
- Ongoing helpdesk support
- Setup of any enhanced security features as required
- Continuous management and monitoring of your BigCloud desktop

Why CMI?

We create, deliver and support secure modern workplace solutions that have a real positive impact to your business. That means reduced operational costs, happy productive staff, better customer service, less risk, more growth.

Technology that helps your staff do their best work, securely, anywhere.
